# IoT Edge Working Group

# Edge/IoT vs Cloud Data Center

Kubernetes has limitations today..but can we fix this?

KubeCon

CloudNativeCon

North America 2018

## Similar

Manage many nodes with  
compute, storage, networking

Want to containerize apps and  
services

Want standardized APIs, tools

Want security features (encryption,  
authentication)

## Different

Resource constrained (small  
node counts, low power  
CPUs, low resources)

Special network  
requirements (protocols,  
topologies)

Challenges of unattended,  
and disconnected operation

# Kubernetes for the Edge

KubeCon

CloudNativeCon

North America 2018

How does Kubernetes interact with the Edge?

1. Edge workloads that run ON Kuberenetes
2. Edge challenges mitigated BY Kubernetes
3. Edge capabilities not easily serviceable by Kubernetes

# Panelists

KubeCon

CloudNativeCon

North America 2018

- Cindy Xing - Huawei
- Dejan Bosanac - Red Hat
- Preston Holmes - Google
- Steve Wong - VMWare

# Our charter

KubeCon

CloudNativeCon

North America 2018

- White paper: <http://bit.ly/iot-edge-whitepaper>
  - Workloads being considered
  - Technical challenges
  - Available architectural solutions

# How to get involved

KubeCon

CloudNativeCon

North America 2018

- <http://bit.ly/wg-iot-edge>
- Regular WG Meeting: Fridays at 16:00 UTC (bi-weekly)
